

SBL Fire Solutions

Saving Life and Property through fire containment

Contractor Competency

SBL Fire Solutions Ltd supply and install Promat Durasteel fire barrier, cable enclosures and fire rated ductwork under license from, the manufacturer Etex Building Performance Ltd.

A specific aspect of this license is to ensure that all works are installed to the highest quality and to this end at least 50% of our workforce, on site, will have taken part in manufacturers training sessions and proved their capability to install the materials as per the manufacturer's recommendations.

All trained operatives have been issued with a Promat Durasteel Installer identity card and this should be carried at all times while installations are taking place.

A sample can be seen below.

Any employed Labour Only Subcontractors must be able to demonstrate the same training, and proportion of operatives prior to their engagement with SBL Fire Solutions Ltd.

Additionally they must agree to comply with all aspects of SBL Fire Solutions Ltd Health and Safety Policy or demonstrate that their own system complies or exceeds those
