

SBL Fire Solutions

Saving Life and Property through fire containment

QUALITY POLICY STATEMENT

SBL Fire Solutions Ltd aims to provide defect free products and services to customers on time and within budget.

As a Promat Durasteel Licensee we work closely with the manufacturer, Etex Building Performance Ltd, in the design development, delivery and installation of every project and invite them to inspect all our works prior, during and following completion of the project

The Company operates its own Quality Plan System for each project undertaking, "Project Design Installation Check Sheet"

The Company monitors its performance through the use of defined quality objectives to identify and improve customer satisfaction.

The Company commits to continue to monitor its quality performance in line with Main Contractor, and Client standards and to adopt all "Good Practice" procedures throughout the organisation.

While the systems supplied by Etex Building Performance Ltd and installed by SBL Fire Solutions Ltd are not CE marked themselves. SBL Fire Solutions Ltd will comply with CE Marked regulations and where CE marked products utilised within the systems, are reasonable available, these will be procured to ensure their conformity with health, safety and environmental protection standards for products sold within the British and European Economic Area.
